AL NOBLAA GROUP

► www.alnoblaa.com ◀

AL NOBLAA GROUP

- We are committed to delivering exceptional solutions that redefine the standards of excellence across industries. Offering world-class solutions in engineering, mining, agriculture, and petroleum.
- Together to meet energy and mining needs through the use of modern technology, empower human resources, operate sustainably, and strengthen partnerships to meet customer needs.
- The group relies on implementing its strategic plans with a focus on customers and future predictability of the external environment to provide higher returns to shareholders by working on competitive projects, reducing costs, and continuing to reshape the line To become more flexible and specific.

Our goals

AL NOBLAA GROUP

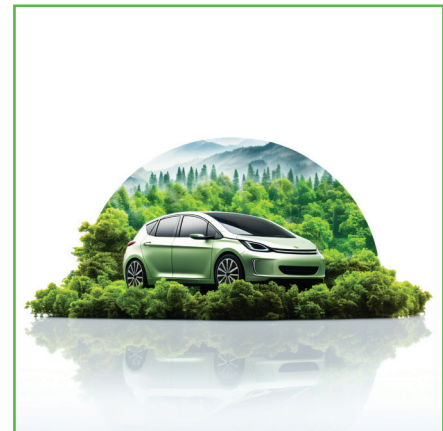

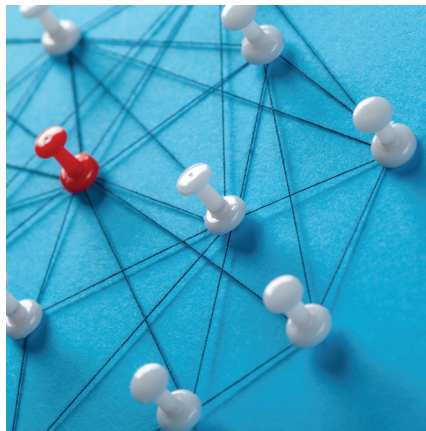

Strives to achieve diversity and inclusion in its business, promoting the core values of honesty, integrity, and customer respect. Our business principles are based on promoting trust, openness, teamwork, and professionalism and honoring what we do and how we run our business and compete in all sectors using modern technology.

Our Business

Commitment to work to attract and provide the best services and diversified products, our broad vision helps us create strong links wherever we do business and take advantage of all the services and experiences we need to succeed in reaching our goal.

Our activities

The company started its activity in the transportation of petroleum derivatives since 2000, then the company decided to expand its activity by selling, buying and distributing petroleum derivatives such as diesel, gasoline, gas, jet fuel and furnace, and providing mining services and agricultural and animal exports, and we opened all markets internally in cooperation with partners working in the field. The group also relies on the diversity and comprehensiveness of its business and opportunities to meet the local and regional market demand to provide the best products and services.

Our Strategy

The group relies on the implementation of its strategic plans by focusing on customers and the future predictability of the external environment to provide higher returns to shareholders by working on competitive projects, reducing costs, and continuing to reshape plans to become more flexible and specific.

Our main strengths include developing and applying technology, and skills and working with experienced partners in dealing with the difficulties we face.

We are always working to develop our fields and follow developments and requests in the global and local markets in order to provide the best competitive service.

Our vision

To be the best in providing petroleum and mining services, engineering solutions, and agricultural and animal exports by safe and innovative means

Our mission

Providing the best services to our customers with innovative solutions that meet their needs and anticipate their aspirations with high quality, while adhering to safety, environmental and community standards and ensuring the sustainability of our services.

Our Values

We are committed to contributing to sustainable development, balancing the interests and strategic objectives of our companies and the requirements of society and integrating all skills and social considerations into our decision-making. We change rules and behavior based on customers' needs, follow the behaviors we expect from them, and aspire to maintain a diverse and inclusive culture where everyone is respected.

Our Entrenched Values

- Transparency
- Everyone is a partner
- Teamwork
- Discrimination in services
- Creativity and innovation
- Commitment to health, safety, security and the environment

Company fleet

The company owns a fleet of trucks and means of transport and deportation for land transport, as well as a fleet of trucks (trucks and tanks) of various capacities ranging from 5,000 liters to 100,000 liters working to transport petroleum derivatives (gasoline – oil gas- jet fuel – jet A-1- Ferns) inside and outside the state of Khartoum.

Aviation fuel supply service

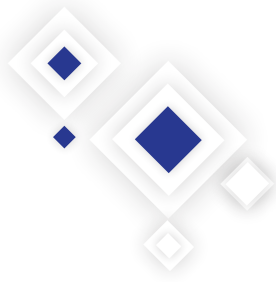

Within the framework of its strategic partnerships, the company provides the service of refueling local and international aircraft through its warehouse located at Khartoum International Airport, with the possibility of distribution at all airports in Sudan.

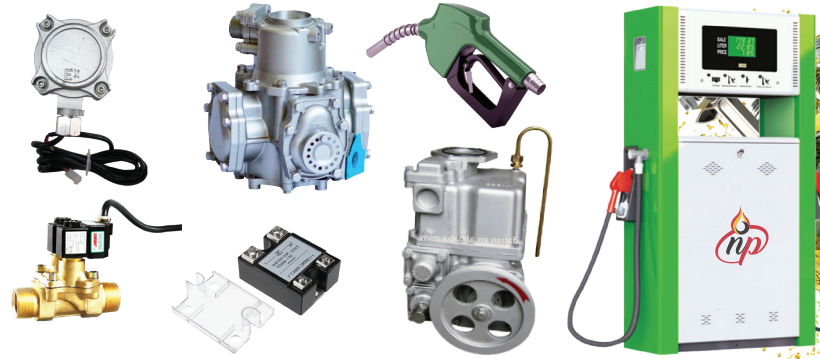

Fuel Internal Distribution

The company owns a fleet of trucks for the internal distribution of fuel to cover the needs of the local market, homes, service and industrial institutions, agricultural projects and companies.

النبلع للبتروول المأءوءة
ALNOBLAA PETROLEUM CO. LTD

Al-Nobalaa Petroleum Company Ltd

Is one of the leading companies in petroleum services represented in the import, storage, and distribution of petroleum derivatives (Gasoline – Gas Oli- Firenze- Jet-A-1 AVGAS). The company is also one of the companies that have obtained a permit from the Sudanese Ministry of Energy as a fuel importer under the (private import) system, which the company hopes to contribute to covering the local market needs of oil derivatives and support service and industrial institutions, agricultural projects and mining companies.

The company operates in the following areas

- Importing petroleum products
- Gasoline • Gas oil • Jet A1- fuel
- Alfirs • AVOGAS • Oils and greases

- Establishment of fuel and gas stations and warehouses.
- Distribution of petroleum products through the company's stations.

The company aims, through its plans, to meet the needs of the following categories of petroleum derivatives:

Service sectors

- Agricultural and animal sectors and projects.
- Health sectors and hospitals.
- Ministries and government agencies.
- Intergovernmental organizations and other organizations.

Investment sectors

- Institutions, banks, and private companies.
- Industrial sectors and factories.
- Educational institutions and universities.
- Mining companies.

- Hotels, apartment complexes, and clubs.
- Domestic and international airlines.

Other

The company provides its services in Port Sudan, Al-Jili, Al-Abyad warehouses, and Khartoum International Airport, with the possibility of deportation and delivery to all states of Sudan.

NP GAS Service

Within the framework of the company's policy to meet the needs of consumers and customers in the local market and to provide the greatest satisfaction to customers, the company launched the mobile service (NP GAS) to provide gasoline and gasoline fuel at customers' premises inside and outside the state of Khartoum.

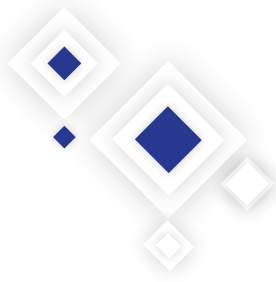

future plans

- Exploration for oil and its derivatives and natural gas.
- Gas distribution services

Fuel station services

- Design and construction of fuel stations
- Station machines (gasoline, petrol, single and double speed machines, small portable AC, DC pumps)
- Spare parts for stations and machines (pumps, pistols, meters, control screens,)
- Measurement and calibration equipment
- Fuel safety equipment

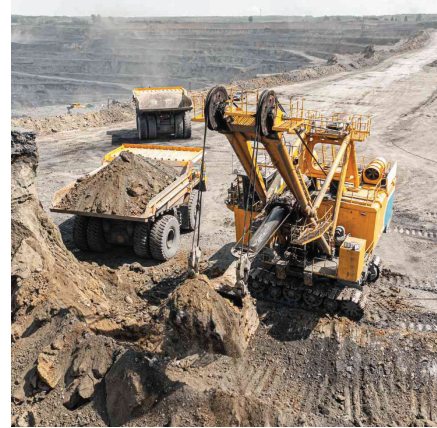

النبلع للتعدين المحدودة ALNOBLAA MINING CO. LTD

Al-Nobalaa Mining Company Limited

With the growing need and demand for minerals globally and the emergence of Sudan as a major producer of minerals, especially gold and chromium, the Mining Company Limited was established to work in the field of mining and exploration for minerals and precious stones. The company seeks through its plans to build effective partnerships locally and regionally to build a distinctive brand in this sector by providing excellent services. It also aims to create good relations with the citizens of the mining areas through its community activities and environmental conservation activities in order to participate in raising the local revenue through the export of local products after adding a preferential distinction to those products.

The company operates in the following areas:

- Fields of Exploration:
- exploration and prospecting for gold.
- Prospecting for chromium and minerals.
- Prospecting for precious stones and ornamental stones.
- Manufacture and export raw and processed gold after the approval of the competent authorities.
- Providing gold mills, accessories, and spare parts.
- Providing mining equipment and mining tools.
- Gold and metal detectors.
- Providing machinery and equipment for mining companies.
- Providing fuel service to companies operating in mining areas.
- Providing inputs and materials for the cement
